TitleRemove the "Plan" page for pet owners

Description ✕

The plan page that a pet owner can access using the leftmost "Plan" link on the header bar (or in the /plan route) is meaningless, as only clinic owners should manage clinic plans. The access to this page must be removed for pet owners as soon as possible.

The screenshot displays the PetClinic Services incident management interface for incident I-000800. The interface includes a top navigation bar with tabs for Properties, Cls, Contacts, Child incidents, Child requests, Work orders, Attachments, Notifications, Impact Analysis, and Known Errors. The main content area is divided into three columns: General Information, Qualification, and Relations.

General Information:

- Organization: PSG2-2324-clinicOwner1-G5-54
- Caller: John Doe
- Status: New
- Origin: portal
- Title: API-based extensions.
- Description: Add features that need the usage of **at least two** external APIs. Submit a different request for each external API. It is unnecessary to integrate the APIs within the codebase (actual integration is proposed as extra tasks; see below), but at least the GUI should simulate (e.g. using mock data) what those APIs would offer.

8.-Conclusión

Se ha observado que durante la monitorización del CA mediante Itop los tiempos establecidos en el CA (tanto como para TTR y TTO) son notoriamente mayores a los reales ya que en el CA se establecen tiempos en horas y las incidencias se han logrado resolver en varios minutos.

No obstante, queremos justificar que no será necesario cambiar los TTR y TTO en el CA ya que nos parecen más reales para una empresa real. Los resultados que hemos obtenido se deben a que se han resuelto uno por uno y con una cara de trabajo baja, pero si atendemos al futuro es posible que la disponibilidad de los desarrolladores sea menor. Por ello hemos considerado oportuno establecer tiempos mayores en el CA para así no arriesgar y contar con más margen por si ocurriera un contratiempo.

Por otro lado no se ha considerado las capturas desde Github ya que estas se crearon como tareas a principio del sprint, por tanto sus valores serían irreales y muy dispares con respecto a los de Itop.

Finalmente, comentar que debido a disponibilidad de integrantes del grupo ha sido imposible crear parejas de trabajo para que un integrante se la asigne a otro una tarea y viceversa.
